Red Panda

9 An estimated 50 per cent of red pandas' habitats
17 can be located within the mountainous forests of
25 the Eastern Himalayas. The red pandas' status is
33 Endangered with roughly a population of less than
35 10,000 individuals.

45 A red panda is typically 50 to 65cm in length
56 with a tail of around 30 to 50cm. They are easily
64 identified by their russet fur and black undercoat.
74 The tail has faint rings around it and their faces
84 have white fur with stripes of red near the eyes.

91 Their diets consist of mainly bamboo alongside
98 other plants, fruits and insects. Interestingly, they
107 are said to eat about 20,000 bamboo leaves in
109 one day!

Questions

1. Look at the first paragraph.
Find and copy a word that means the same as as 'approximately'.

2. How many bamboo leaves can a red panda eat in one day?

3. Summarise a red panda's appearance in 25 words or fewer.

4. What have you learnt about red pandas that you didn't know before?
