Very impressed with the communication from teachers and intervention methods implemented. The fact they don't feel happy at school is more of a social reason than a teaching or support reason. Local authority process is too long and not adequate and needs to be reviewed at a county level as too many children's needs are not being met or getting help quickly enough.

It has been a tough year - appreciate everything the school has achieved. It is a small class so less interventions needed..

School have been fantastic. The Local Authority process has been painful and very slow, the hub is not efficient at all and not user friendly.
